On-Premises
Licenses

Elastic OCPU Scaling - Pay Only for What You Use

Integrated Security from Data to Identity

Defense in Depth

Operator Access Control (OpCtl)

Prevent, Detect, and Respond

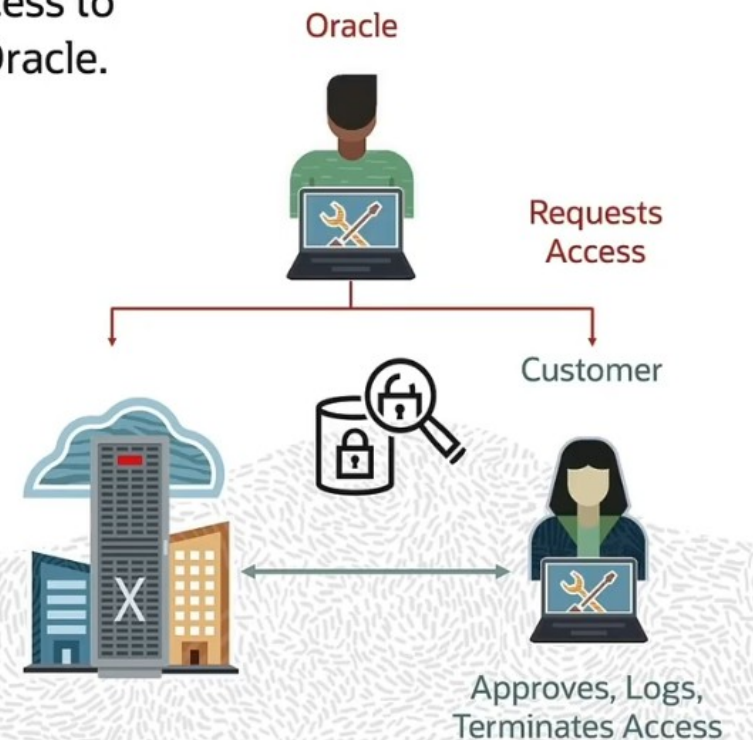

OpCtl enables customers to grant, audit, and revoke access to Exadata Cloud@Customer infrastructure managed by Oracle.

Customers control access to infrastructure by Oracle operators by limiting:

- components they can access
- when they have access
- commands they can execute

Customers can observe and record Oracle operator commands and keystrokes that the Oracle staff runs.

Can Terminate Oracle operator connection & process

Enhanced Security for Regulated Industries
